

TOLUWALOPE EMMANUEL ADEGOKE

Frontend Developer | React · Next.js · TypeScript · Tailwind CSS

Oyo State, Nigeria • tolu.nuell@email.com • [Portfolio](#) • [LinkedIn](#) • [Github](#)

PROFESSIONAL SUMMARY

Frontend Developer with hands-on experience shipping responsive, production-quality web applications using React, Next.js, TypeScript, and Tailwind CSS. Comfortable owning a feature end to end, from component architecture and state management to API and payment integrations. Self-taught and project-driven, with a portfolio of self-built SaaS products and an incubated startup that demonstrate independent ownership from concept through deployment. Seeking a junior Frontend Developer / Software Engineer role to bring the same rigor and product thinking to a team.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3
- **Frontend:** React, Next.js, Tailwind CSS, Framer Motion, Responsive / Mobile-First Design, Component-Based Architecture
- **Full-Stack Exposure:** Supabase, Prisma, RESTful API Integration
- **Tools & Workflow:** Git/GitHub, Figma, Vercel, Chrome DevTools, VS Code, Agile/Iterative Development

EXPERIENCE

Frontend Development Intern, FireSwitch

Internship, 2026

- Contributed frontend development to ValSafe, the company's incident reporting and safety management platform, including onboarding-flow UI work.
- Resolved a CSS image-overlay layout issue in Tailwind, improving visual consistency on the onboarding screen.
- Migrated Zofu, the company's AI-powered resume-tailoring tool for beating ATS filters, from Next.js to React.
- Connected Zofu to a working backend, building on its existing Supabase integration.

Independent Frontend Developer, Self-Directed Product Development

2022 – Present

- Designed, built, and deployed multiple full-featured web applications end to end using React, Next.js, and Tailwind CSS, taking each from architecture through to live deployment on Vercel.
- Built accessible, mobile-first UI, including a responsive calendar view and touch-compatible drag-and-drop interactions adapted for both desktop and mobile input.
- Integrated third-party services, including Supabase, Prisma, and Convex for auth and data, to power production-style application features.
- Diagnosed and fixed cross-browser layout and responsiveness bugs in Tailwind CSS, improving UI consistency across breakpoints and devices.
- Maintained clean, modular, scalable code architecture using Git-based version control across all projects.

PROJECTS

SoloStack: Freelance Business Management SaaS

Startup, In Development

Live: www.solostack.ng

- Co-building SoloStack, an early-stage startup building a business management platform for African freelancers, with client CRM, proposal builder, contracts, project tracking, and invoicing/income tools on the roadmap.
- Building the proposal builder module, giving freelancers a fast way to create and send client-ready proposals directly from the platform.
- Personally designing and building the product's UI end to end, from component architecture to visual polish.

PostFlow: Social Media Content Planner (Personal Project)

Feb 2026

Live: postflow-up.vercel.app

- Building a SaaS-style content planner with a drag-and-drop scheduling calendar, live post previews, and multi-workspace support, backed by Convex for real-time data.
- Engineered a fully responsive calendar component that switches to an agenda/list view on mobile while preserving drag-and-drop via touch input.
- Added an in-context reschedule date picker to the post preview flow to streamline content scheduling.

EDUCATION

Ladoke Akintola University of Technology

Graduated 2024

Bachelor of Technology in Physiology. Transitioned into frontend development through self-directed, project-based learning.

Responsive Web Design, freeCodeCamp (2022)
